I have it installed, and it opens fine for me, but I'm experiencing these problems (not only with ETLite):. . The program will load, but no video will appear. . I think it may be related to my Nvidia card, I've read somewhere that it doesn't work well with Nvidia cards, and I have an Nvidia card. But I'm not sure if I'm right. . The video is stored on my computer's internal SSD drive and is called Rufus. It is supposed to be a video editing software but for some reason it doesn't show videos. . I need to do voice over for my next video, but I don't have a microphone. Is there a way I can capture audio from my computer's speakers? . Please be kind enough to point me in the right direction! . As always, thank you in advance for your help and time! . . :. . . . . .
