Provides a zip archive of the converted PDF documents. Databases OpenLDAP is an open source, high-performance, cross-platform implementation of the LDAP directory protocol which supports LDAPv3 and LDAPv2 (e.g.,), and, using an extension module, LDAPv2 over TLS. OpenLDAP was originally written by OpenLDAP Software Inc. The current OpenLDAP Software Inc. no longer develops the software and is now a community project. CSNAPSHOT and TAP are built in MariaDB-server features. MariaDB offers a way to back up databases with TAP and CSNAPSHOT, a file format with the MySQL specification. It supports MySQL 5.6 and higher. TAP also adds support for the Optimized Binary Log format, which can be stored in another MariaDB-server-feature, ROW-ID-format tables, which is an optimized form of the Binary Log format. 2d92ce491b
