Bit Driver Updater (recommended tool for backing up and restoring drivers)  
NTSC/PAL/SECAM/NTSC Digital Audio Audio (Real-time conversion of recordings from analog microphones or from external signal sources to digital format using a mixer) Event Log Manager (analogue and digital display for real-time event tracking) DisplayPort (network port supporting IPv6) 2. In all cases, the presence of an empty hard disk space for a disk array is not a problem! There is no need to use a module to place an SSD disk under the system. 3. Hard drive with solid state drive (SSD) To improve the performance and efficiency of all drives, we use an SSD in our solution. Due to their advantages, SSD drives have a large capacity and service life. For example, a 1 TB 128 GB hard drive or 1 TB/s SSD has a 6 times shorter life and about 4 times longer working time than a traditional hard drive. 4. Flash card reader To take full advantage of SSD drives, the SD and flash card reader (if provided) must be efficient, fast, and perform well in order to process input data quickly. 5. PC connection In our solution, you can connect SSDs and configure them to run scenarios with the highest performance and speed. 6. Easy to install and configure Using a single installation software (SW), your OLT/PDU solution's installer will automatically install the software and firmware to your hard drive or SSD 7 Audible One of our top audio integrators in the world, Audacity is the perfect solution for quality audio and video. We use it in our system for live triggering, adding effects, image enhancement. 8.GUI (graphical user interface) Our system uses GU IB (GUI - Using Information Base - uses a database to manage files) for user interaction. You can use it when you need to quickly, efficiently and securely organize your data center and manage your storage devices. 9. SSD controller configurator When selecting and installing an SSD, we use turnkey SSD configurators, which contain a general set of
