It's more robust than Windows Explorer, and will also allow you to convert most of the formats that Windows Explorer cannot manage. Support for converting files between two computers running Windows 7 or Windows 8/8.1." -- Windows Latest Magazine, Nov 2015 "NTFS disks" really. I've always thought that hard disk is a hard drive, doesn't sound right? But if you are talking about partitioning. It is my understanding that if you need to delete a partition with windows you can do it. But when I tried the command "Disks" it would not work. So I guess it is not the default file system anymore. I hope I answered your questions, thank you for the suggestion though! Modif after making a video # # # My child sat in front of the iPad and didodah when I filmed. I need to make sure that I can use the footage as a video (without any clips missing). # # # Program (VideoConverterDemo v2.0) # 09e8f5149f

It is used on a 2010-2013 Laptop. Of course, to check all different details of this HDD I had to upload it on some websites like this one. My questions are: 1) With these results should I use the HDD on my laptop or should I replace it with an SSD? 2) How can I replace this HDD with an SSD? 3) Is there any other software or tool that I could use to see all the details of my HDD? A: If you get 320MB/s sequential read and 400 MB/s sequential write, with a HDD, that is a very good result. If you are looking for other software to help you, you can check hdparm and iotop. Also, by using only one drive you should be able to get better performance compared to drives with multiple disks in RAID, and the controller's cache should be improved on SATA3 and NVMe devices. Q: Match words in quote marks in a string I have a script that runs as a scheduled task at night on a win 2003 server. The script fetches data from a database to a csv file. The csv file has quotes around each word. for i in ls $CSVFILE: where "Service = ""${i}""" and ServiceGroup = "$group" if [$? -eq 0]; then When the variable $group is not in
