To learn more, please read the Readme.txt file contained in the download. Questions and comments are welcome: Write to the developer: Web gallery maker Notes: Support for Windows 7 or Windows 8. This application is distributed in a format appropriate for Windows 7 or Windows 8. On Windows 8, it is possible to run a separate installation of Visual Basic 2010 Express Edition in the "Classic" window mode. In this mode, the menu options and control functions are integrated into the main program window, and the status bar is displayed at the bottom of the window. A separate file Web gallery maker.vbe is included in the download, but it's only for use with Windows 8. If you try to use this file with Windows 7, you'll get an error message. If you want to run the program in classic mode, right-click on the file Web gallery maker.exe, then click on the menu item "Run as administrator". You can download the program file for a 32-bit version of Windows 10 (x64). You can download the program file for a 64-bit version of Windows 10 (x64). You can download the program file for a 32-bit version of Windows 8 (x64). You can download the program file for a 64-bit version of Windows 8 (x64). Some known bugs: When you run the program in the slideshow mode, some image thumbnails are rendered incorrectly. I haven't been able to reproduce the error, but I found the problem that I can't solve. The image itself is rendered correctly. When you select the photo file to be displayed, the selected photo is displayed with a blank area in the center. I haven't been able to find a solution to the problem. If you run the program in the slideshow mode, the status bar can sometimes be hidden behind the selected photo. Installation of the program files is included in the download, but the download is a compressed folder. To install the program in any
