You can use it on an environment with an Internet connection to check the availability and performance of any website. With the help of HTTP Check, you can check the performance of a website in terms of response time, number of requests per second and other variables. Moreover, the tool provides you with a range of predefined test cases. A: You can use an external tool to perform simple performance tests using the FE itself. Application of Dynamic Contrast-Enhanced MRI in the Diagnosis of Extraocular Vascular Malformations. To use dynamic contrast-enhanced (DCE)-MRI in the diagnosis of extraocular vascular malformations (EVMs). Retrospective case series. Ten patients with EVMs who presented with proptosis or extraocular movement restriction were included in this study. All 10 patients underwent DCE-MRI and were diagnosed with EVMs by using the established histopathologic features as the reference standard. The diagnosis of EVMs in all patients was confirmed by DCE-MRI. DCE-MRI revealed that these EVMs exhibited heterogeneous enhancement in all lesions. High signal intensity lesions showed an enhancement pattern of strong or quick enhancement, whereas low signal intensity lesions exhibited an enhancement pattern of slow or no enhancement. DCE-MRI is useful in the diagnosis of EVMs, which should be considered as a differential diagnosis in cases of extraocular growth and proptosis. Higher education and the digital economy The world is changing. Higher education in all its forms is affected by the digital economy. Because our academic world is also a global one, the effects of the digital economy are felt as much on those who study abroad as on those at home. The implications for higher education of increased wealth, opportunity and a sense of well-being for students and alumni around the world are manifold. The impact of the digital economy The digital economy has changed society profoundly. It has increased choice, flexibility, opportunity, connectivity and well-being. It has resulted in the growth
