HLP Free Memory Optimizer is a lightweight software application whose purpose is to help you automatically monitor your system in the background and free up some memory in order to boost the overall performance of your computer. Clean looks After a fast and simple installation process, you are welcomed by a straightforward design that embeds all configuration settings into a single file. A help manual is not included in the package but you can quickly get an idea about how to tweak the dedicated parameters because they look intuitive. Optimize your system memory HLP Free Memory Optimizer gives you the possibility to choose between three optimization modes, namely Best, Better, or Good. You can manually activate the process anytime. Plus, you can make the application automatically free up memory when the free RAM value drops below a certain level. What's more, the program reveals information about the total, used, and free RAM directly in the main window in real time. The tool does not eat up a lot of CPU and memory resources so you can keep it running in the background without worrying that it burdens the overall performance of your computer. Bottom line All things considered, HLP Free Memory Optimizer comes packed with several useful options for helping you free up memory on the fly, and can be configured by both rookies and professionals. On the downside, it has not been updated for a long time so you may bump into compatibility issues on newer operating systems like Windows 8. You can make use of its capabilities especially on older operating systems. **JAVASCRIPT UNDISPLAYED IN COPY, PC DOWNLOAD, MOBILE, AND MORE..** \*AUDIO REPLAY RECORDING :- MP3, MP4, AAC, and more.
